

# Voyages of The North Cape Express

---

Journey mainland Norway between its capital and its capes during the mesmerizing Northern Lights seasons.

## **Nature runs the show**

Though we always do our utmost to stick to our itinerary, the weather on the Norwegian coast sometimes has other plans.

When the water is too choppy or the fog is too thick, your safety comes first, every time. That's the case even if it means we have to change our itinerary or cancel onshore excursions at the last minute.

## **A word on wildlife**

Just like the weather, we can't control what wildlife you get to see on your voyage with us. A lot depends on the season, migration patterns, and luck.

Nature and wildlife on the Norwegian coast are unpredictable, but really, that's what makes the surprise encounters all the more special.

# The North Cape Express

As the Northern Lights begin their annual dance through the longer nights, we embark on a history-making sailing. The new North Cape Express is a voyage of two significant firsts.

For the first time, we set sail from Oslo, Norway's cool, vibrant capital. The voyage also marks the first time we explore the length of the astounding Norwegian coast. In between, we show you ports that are brand new to our ships and warmly introduce you to some of our enduring favorite places.
